

About Us

MSS is located in Tuzla shipyard area which enables us to reach the different shipyards within 1 km. Thanks to strong connections with the supply area, MSS can provide you customized offers with a competitive price in a minimum of time. Relationships with our customers are extremely important for us. We are highly dedicated and reliable to give you the best service with our young and modern team.

Metin Ship Supply is a family business offering supply services to the ships which are coming to Turkish ports & Turkish shipyards. The company has been founded by Mr Fatih Metin and his wife, based on their solid experiences in maritime sector in Turkey and France in September 2020.

Ship Chanding & Technical Service

We offer a complete range of fresh, frozen and dry provision. Our purchasing department sources products from all over the world to ensure that the correct balance of price and quality is always achieved. Using our vast experience in supplying crew from different Nationalities.

The quality of our products is our top priority. Therefore, we make sure they are supplied to your vessels in optimum conditions with the best brands. We have agreed with the best transportation companies, which enable transportation of your order with the best possible temperature and therefore unbreak the cold supply chain. Cooling temperature of our refrigerated trucks are electronically monitored & the truck temperature data is regularly recorded & stored. We can easily provide you the temperature data whenever required after delivery.

In order to ensure fresh & colorful supply of the fresh seasonal fruits & vegetables as they are, we purchase them from local wholesalers on the day of delivery.

We assure you that our products will be properly packaged & labelled.

Our priority is provide every marine, offshore equipment and spare parts in top quality with necessary certifications that a vessel may need during her voyage and mission within our "best price and efficient service" policy while maintaining international regulators

SPARE PARTS

- Marine paints and chemicals, Lubricant Oils
- Electrical equipment's
- Safety equipment's
- Life rafts maintenance, service and supplies
- Hatch cover tape, available in sizes 3' / 4' / 6'
- Brown Tapes
- Plastic/Tarpaulin/Craft papers
- Cabin stores in different qualities
- Ropes, hawsers and wire cables
- Valves
- Oil Joint Sheet
- Rubber joint sheets

ENGINE STORES

- Ball Bearings
- Oil seals
- Gaskets
- Thermometers & pressure gauges
- Hydraulic pipes and couplings
- Filters
- V- Belts

- Eye-Wash Kits & Solutions

Shipyard Agency & Brokering

Metin Brokering Services is committed to provide a wide range of options for its clients both local and international Shipyards, Demolition Yards, Major Steel Construction Builders and Tonnage Companies. Sale & Purchase Agreements and Chartering Contracts are also major activities of our brokering services.

Our brokering services is not limited to introducing parties to each other but also includes the process after the settlement of agreement in order to protect rights of its clients and play a mediator role in case required between parties.

Moreover for repair, conversion and rebuilding projects we provide best of our knowledge at final bill settlement stage for a win-win amicable solution.

Bunkering Facilities

Supply bunkers to vessels calling African Ports, either alongside or OPL. We also provide for environmental friendly removal of cargo sludge, engine sludges, contaminated hydrocarbons and washing water from vessels. We provide supply of provisions, bonded stores, cabin stores and deck & engine stores, whether requested at berth, anchorage or off-port limits.

BWTS System

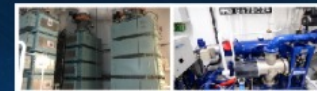

With the entry into force of the IMO Ballast Water Management Convention on 8 September 2017, substantial number of vessels are required to install a Ballast Water Treatment System (BWTS) by 8 September 2024. Metin Ship Supply is upgraded and extended its facilities to meet the arisen demand in the market. With a successful engineering study and preparation period, we can complete full installation within optimum time subject to early delivery of arrangement plans and drawings. Separate pipe fabrication areas are serving for isometric spool fabrications and we can manage up to 6 BWTS installations simultaneously.

We also can offer detailed engineering study and 3D scanning solutions limited to workload capacity.

Scrubber

A scrubber is a device installed in the exhaust system after the engine or boiler that treats exhaust gas with a variety of substances, which may include seawater, chemically treated freshwater or dry substances, to remove most of the SOx from the exhaust and reduce PM. After passing through the scrubber system, the compliant exhaust is released to the atmosphere.

Metin Ship Supply is working on the system for 6 month the and become the most active yard for scrubber installations. Inhouse GRE/CAVE workshops, SMD pipe workshop, roof closed storage areas, trailing from authorized companies for installations are only some of the implemented investments to provide better service.

Repair Services

All type of mechanical overhauls and repairs for your original equipments installed. Main Engine Crankshaft Gears Propulsion Deck Machinery All size of Pumps Generators Governors Turbochargers and other various product maintenance.
